

## Installation Addendum for Model 632C, 645C, 945C and 1445C

This installation addendum is intended for all 632C, 645C, 945C and 1445C models using optional Ceiling Mounting (CL) brackets.

On the back of all units is a UL label that states: **Do not install closer than 6 inches (15 cm) from vertical or horizontal surfaces.** This is written for Cove (wall) mounting installation.

For all wall mounted cove models install 6 inches (15 cm) from any horizontal surface (ceiling) above the unit, or 6 inches (15 cm) from any vertical surface (wall) to the sides of the unit.

For ceiling mounted cove models install 6 inches (15 cm) from any vertical surface (wall) to the sides of the unit in any direction.
