

Why Use Infrared Heating?

Save Money

- Lower heating bills for homeowners & renters
- Zero maintenance costs
- Lifetime warranty
- Made in Washington state, not overseas!

Zero Maintenance

- Solid state construction with no moving parts
- Perfect for new construction and retrofit projects
- Requires no ducting
- 350,000 hours or 40 years of continuous use
- Reusable if drug use remediation is a factor.

Boost Efficiency

- Our infrared heaters use up to 50% less energy than conventional electric heating systems
- Low carbon footprint due to infrared heating up people at a lower room temperature
- Objects in the room are heated as well

Enhance Comfort

- The renter or homeowner is able to heat only the rooms they are using
- Heaters produce sun-like-warmth
- No wall space is taken up – put furniture where desired
- no risk of fire – unlike wall and space heaters
